

TO WHOM IT MAY CONCERN

Stone Italiana quartz products follow very strict quality criteria and comply with all health and safety requirements of the existing Regulations.

We hereby confirm that Stone Italiana quartz materials are:

- In compliance with the **NSF** requirements for contact with food;
- Guaranteed with no pollutant emissions by **Greenguard and Greenguard Gold certifications**;
- They comply with **Floorscore** requirements as regards VOC emissions;
- All chemical products used for slabs production are in accordance with the **REACH** European Regulation;
- The formulations used by Stone Italiana comply with the **EC Regulation no. 1935/2004** for food contact materials;
- Stone Italiana materials marked with the Recycling Component symbol can contribute to obtain Leed credits since they have post-consumer elements;
- Stone Italiana S.p.A. applies an integrated Quality, Health & Safety and Environment System compliant with **ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007** which ensures that all products are non-hazardous for the health and uses cutting-edge equipment to produce them.

Stone Italiana quartz surfaces are **completely safe for the fabricators who process them** according to the **VPI – Voluntary Product Information** available on www.stoneitaliana.com website, Download Area section, Safety Measures.

In addition to the above Stone Italiana S.p.A. declares that its materials do not include cadmium or heavy metals in their formulas.

STONE ITALIANA S.P.A.
